SKILLS

Languages: JavaScript, TypeScript, HTML5, CSS3, SQL

Frameworks & Libraries: React.js, Redux, Redux Toolkit, Angular 8, Bootstrap 5, Material UI, Node.js, Jest

Tools & Other: Git, GitHub, GitLab, Vite, Webpack, Postman, GitHub Copilot, Cursor AI, CI/CD Pipeline

WORK EXPERIENCE

Lead Software Engineer | Persistent Systems, Pune

December 2025 – Present

- Independently analyzed and enhanced legacy systems, delivering 4+ production features with minimal guidance.
- Managed end-to-end deployment across Dev, UAT, and Production environments for 4+ releases.
- Fixed a production level issue in an existing Angular application by quickly understanding the codebase, restoring feature access for all intended users.
- Actively managed GitLab workflows including branching strategy, merge requests, and conflict resolution in a multi-developer environment.
- Handled implementation of 6+ UAT change requests, improving pre-production validation and reducing post-release issues.

Senior Software Engineer | Persistent Systems, Pune

June 2024 – December 2025

- Contributed to the design and development of a real-time client-facing Kanban dashboard in React.js (Version 18), improving operational visibility.
- Optimized component rendering using React hooks and state handling via Context API and Redux, reducing re-renders and enabling efficient data sharing.
- Applied AI-assisted development tools (GitHub Copilot, Persistent's SASVA) to reduce debugging effort and speed up bug resolution across the application.
- Participated in code reviews, debugged issues, and collaborated in Agile sprints to ensure high code quality and timely delivery.
- Utilized component-based React design patterns to improve application scalability, reusability, and maintainability.

Software Engineer | Persistent Systems, Pune

June 2022 – May 2024

- Integrated 5+ Google Maps API services and contributed to 3+ client-facing POCs, delivering dynamic map functionality and showcasing location-based solutions.
- Developed and maintained reusable React.js UI components optimized for performance and responsiveness.
- Integrated 10+ RESTful APIs using Axios and Fetch with robust error handling, loading states, and optimized data flow.
- Implemented JWT-based authentication workflows with secure token storage and authorization flows across client applications.
- Applied TypeScript for type-safe development, reducing runtime errors and improving code maintainability across multiple frontend applications.

PROJECTS

Movixer – Movie Search Web App | React.js, Firebase, OMDB API, Material UI, Framer Motion, Bootstrap 5 | [Live Demo](#)

- Built a responsive movie search app with Firebase authentication and dynamic movie details using OMDB API.
- Designed an animated UI using Material UI and Framer Motion for a modern user experience.

CERTIFICATIONS & AWARDS

- [React Developer Certification — Persistent University](#)
- Special Mention Award — Google Maps Hackathon by Hack2Skill 2023 (4-member team)
- [Google Cloud Associate Cloud Engineer Certification](#)

EDUCATION

B.Tech in Computer Science and Engineering

DKTE's Textile and Engineering Institute

CGPA: 7.91 / 10

Aug 2018 – Jun 2022
